Division II National Aggregation Overall

Study Overview

Introduction.

The Federal Graduation Rate, Graduation Success Rate (GSR) and Academic Success Rate (ASR) all measure the graduation success of students at NCAA member institutions in a relatively similar fashion. At their core, all are based on a comparison of the number of students who entered a college or university in a given year and the number of those who graduated within six years of their initial enrollment. For example, if 100 students entered and 60 graduated within six years, the rate is 60 percent.

$$\text{Rate} = \frac{\text{Cohort Members Graduating within 6 Years}}{\text{All Cohort Members}} * 100$$

Where these rates differ is in how each defines the relevant cohort of students.

Definitions.

Federal Graduation Rate.

An institution's Federal Graduation Rate cohort for a given academic year includes undergraduate students who enrolled in the fall of that academic year as first-time, full-time, baccalaureate-degree-seeking freshmen. The Federal Graduation Rate cohort for the entire student-body includes all students who meet that definition; the federal cohort for student-athletes includes those who meet that definition and receive athletics aid from the college or university for any period during their freshman year. [Note: Athletics aid is a grant, scholarship, tuition waiver or other assistance that is awarded on the basis of athletics ability.]

The federal student-body and student-athlete cohorts are not mutually exclusive; student-athletes are included in both (i.e., the student-athlete cohort is a subset of the student-body cohort). Students and student-athletes who become permanently disabled, leave school to join the armed forces or foreign services, leave to attend a church mission, or die during the six-year collection window are considered "allowable exclusions" and are removed from the cohort.

Graduation Success Rate (GSR).

The GSR is calculated only for student-athletes who are on a team that plays at the NCAA Division I level. An institution's GSR cohort for a given year includes the student-athletes in the federal cohort for that year as defined above (minus exclusions), as well as student-athletes who entered midyear and those who transferred into the institution from either two-year or four-year colleges (see below for more details on transfers). In the GSR, student-athletes who leave the institution but would have been academically eligible to compete in athletics if they had returned, are removed from the cohort thus reducing the denominator of the rate.

For teams that offer athletically related financial aid, midyear enrollees and transfers must receive athletics aid in their first term at the institution to be included in the GSR cohort.

Transfers are placed in the cohort corresponding to their first year of full-time enrollment in any postsecondary institution. For example, a student-athlete who first enrolls full time in Institution A in 2002-03, then transfers to Institution B in 2004-05, would be part of Institution B's 2002-03 GSR cohort. If Institution A is an NCAA member and the student-athlete left in good academic standing, he or she is essentially removed from Institution A's 2002-03 GSR cohort and added to Institution B's 2002-03 cohort.

Some Division I institutions do not offer athletically related financial aid (Ivy League, military academies) or do not grant athletically related financial aid in all of their sponsored sports. The GSR cohort for these institutions or squads will consist of freshmen who are on the roster as of the team's first date of competition.

GSR Calculation Formula.

Graduates:

[First-Time, Full-Time Fall Freshmen on Athletics Aid]

+

[2- and 4-Year Transfers on Athletics Aid]

+

[January Enrollees on Athletics Aid]

+

$GSR = \frac{[Non-Scholarship\ Student-Athletes\ if\ Institution/Team\ Does\ not\ offer\ Athletics\ Aid]}{Enrolled:\left[\begin{array}{l} First-Time,\ Full-Time \\ Fall\ Freshmen \\ on\ Athletics\ Aid \\ + \\ 2- \text{ and } 4-Year \\ Transfers\ on \\ Athletics\ Aid \\ + \\ January \\ Enrollees\ on \\ Athletics\ Aid \\ + \\ Non-Scholarship \\ Student-Athletes\ if \\ Institution/Team \\ Does\ not\ Offer \\ Athletics\ Aid \end{array}\right] - Excluded:\left[\begin{array}{l} First-Time,\ Full-Time \\ Fall\ Freshmen \\ on\ Athletics\ Aid \\ + \\ 2- \text{ and } 4-Year \\ Transfers\ on \\ Athletics\ Aid \\ + \\ January \\ Enrollees\ on \\ Athletics\ Aid \\ + \\ Non-Scholarship \\ Student-Athletes\ if \\ Institution/Team \\ Does\ not\ Offer \\ Athletics\ Aid \end{array}\right] - Left\ Eligible:\left[\begin{array}{l} First-Time,\ Full-Time \\ Fall\ Freshmen \\ on\ Athletics\ Aid \\ + \\ 2- \text{ and } 4-Year \\ Transfers\ on \\ Athletics\ Aid \\ + \\ January \\ Enrollees\ on \\ Athletics\ Aid \\ + \\ Non-Scholarship \\ Student-Athletes\ if \\ Institution/Team \\ Does\ not\ Offer \\ Athletics\ Aid \end{array}\right]}$

$\left(\begin{array}{l} First-Time,\ Full-Time \\ Fall\ Freshmen \\ on\ Athletics\ Aid \\ + \\ 2- \text{ and } 4-Year \\ Transfers\ on \\ Athletics\ Aid \\ + \\ January \\ Enrollees\ on \\ Athletics\ Aid \\ + \\ Non-Scholarship \\ Student-Athletes\ if \\ Institution/Team \\ Does\ not\ Offer \\ Athletics\ Aid \end{array}\right) - \left(\begin{array}{l} First-Time,\ Full-Time \\ Fall\ Freshmen \\ on\ Athletics\ Aid \\ + \\ 2- \text{ and } 4-Year \\ Transfers\ on \\ Athletics\ Aid \\ + \\ January \\ Enrollees\ on \\ Athletics\ Aid \\ + \\ Non-Scholarship \\ Student-Athletes\ if \\ Institution/Team \\ Does\ not\ Offer \\ Athletics\ Aid \end{array}\right) - \left(\begin{array}{l} First-Time,\ Full-Time \\ Fall\ Freshmen \\ on\ Athletics\ Aid \\ + \\ 2- \text{ and } 4-Year \\ Transfers\ on \\ Athletics\ Aid \\ + \\ January \\ Enrollees\ on \\ Athletics\ Aid \\ + \\ Non-Scholarship \\ Student-Athletes\ if \\ Institution/Team \\ Does\ not\ Offer \\ Athletics\ Aid \end{array}\right)$

Academic Success Rate (ASR).

The ASR is calculated only for student-athletes who are on a team that plays at the NCAA Division II level. The cohort definition is identical to Division I's GSR, except that it includes **all** non-aided freshmen student-athletes who are on a roster during their first year at the institution, rather than just those on athletics aid.

ASR Calculation Formula.

Graduates:

$$ASR = \frac{[First-Time, Full-Time Fall Freshmen on Athletics Aid] + [2- and 4-Year Transfers on Athletics Aid] + [January Enrollees on Athletics Aid] + [Non-Scholarship Student-Athletes]}{\left(\begin{array}{c} Enrolled: \\ [First-Time, Full-Time Fall Freshmen on Athletics Aid] \\ + \\ [2- and 4-Year Transfers on Athletics Aid] \\ + \\ [January Enrollees on Athletics Aid] \\ + \\ [Non-Scholarship Student-Athletes] \end{array} \right) - \left(\begin{array}{c} Excluded: \\ [First-Time, Full-Time Fall Freshmen on Athletics Aid] \\ + \\ [2- and 4-Year Transfers on Athletics Aid] \\ + \\ [January Enrollees on Athletics Aid] \\ + \\ [Non-Scholarship Student-Athletes] \end{array} \right) - \left(\begin{array}{c} Left Eligible: \\ [First-Time, Full-Time Fall Freshmen on Athletics Aid] \\ + \\ [2- and 4-Year Transfers on Athletics Aid] \\ + \\ [January Enrollees on Athletics Aid] \\ + \\ [Non-Scholarship Student-Athletes] \end{array} \right)}$$

Data File No. 6: Division II National Aggregation Overall.***General Note.***

This file should be used for analyses of student-athlete data at the sport level for the entire Division II population. This file is aggregated at the sport level for Division II. It contains national aggregated numbers on Federal Graduation Rate and ASR, as well as numerators and denominators for both rates at the sport level. The sample included in this file covers Division II student-athletes from cohort 1995 through cohort 2008. Because the sample included in this file

is limited to **active** Division II member schools, the numbers in this data file may differ slightly from the national aggregated numbers in the graduation rate reports published on ncaa.org.

Key Terms.

Cohort.

A cohort is a group of students who began their full-time postsecondary education in the same academic year. In this study, cohort is named as the year of the fall term. For example, student-athlete cohort 1995 refers to student athletes who first began college full time during the 1995-1996 academic year.

Single-Year (or Single-Cohort) Aggregation.

This file contains national aggregated numbers for the Federal Graduation Rate and ASR for each cohort from 1995 through 2008. The rates for a given cohort are reported in the spring immediately after the cohort's six-year graduation window has expired. Schools may also correct these rates during the following three reporting periods; after that, the Federal Graduation Rate/ASR numbers become final. These final numbers are reported in this data file. Because publicly reported rates are not revised after the first year, the rates in this data file may differ slightly from the single-year rates reported in the searchable database on ncaa.org.

Cohort	First FED/ASR report	Last year for FED/ASR correction
1995	Spring 2002	Spring 2005

Federal Graduation Rate and ASR (Division II) Calculation.

Please see the Study Overview section of this document for information on cohort definition and rate calculation.

To calculate a Federal Graduation Rate or ASR using this dataset:

1. Choose the appropriate aggregation (e.g., sport) and sum the numerators and denominators for that aggregate group.
2. Divide the summed numerator by the summed denominator and multiply by 100.

Note: In an effort to ensure confidentiality, this file was carefully examined for low cell sizes. A numerator or denominator value of three or fewer was deleted and is treated as missing in this data set. If a numerator was deleted, so too was the corresponding denominator. Consequently, using this data file, it may not be possible to calculate Federal Graduation Rate or ASR for each sport.

ICPSR 30022

NCAA Division I and II Graduation Success Rate and Academic Success Rate, 1995-2008 Cohorts [United States]

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
